

DISOSAVE X

PC legal-for-trade memory for Schenck Process weighing electronics

- Long-term memory for legal-for-trade weighing data
- Solution for Standard WINDOWS PC
- Suitable for 24/7 operation
- Can be installed as Service
- Modern user interface
- Conforms to current calibration requirements
- Export functions

Application

The legal-for-trade memory program DISOSAVE X provides the user with the following functionality:

- Legal-for-trade storage of weighing data on the PC's hard drive.
- Legal-for-trade displaying, evaluation and printing of the saved values.

DISOSAVE X has an EU approval (Parts Certificate, PC) as legal-for-trade long-term memory. The type of data storage guarantees a high level of security against the loss or falsification of data. The combination of standard-PC + DISOSAVE realizes the legal-for-trade data storage on the user's PC.

Construction

PC program for WINDOWS 7 / 10 / Server 2012 ff for legal-for-trade storage of weighing results. Delivery on CD for installation of the program on a standard PC.

Legal-for-trade storage of weighing results with DISOSAVE X

The legal-for-trade long-term memory directly performs the role of the alibi printer – however it is completely maintenance-free.

The data storage is triggered either by another PC program (DISOVIEW X, MULTIRAIL) or data is mirrored from the internal legal-for-trade memory from one or more connected weighing electronics.

Automatic backup functions facilitate a secure 24/7 operation of the installation.

Display / Evaluate

Apart from the secure and convenient saving of weighing results, DISOSAVE offers additional functions for displaying and evaluating the saved values.

This includes the following functions:

- Displaying the complete legal-for-trade memory. All entries are displayed, sorted by date / time of storage.
- Display of selected entries: The filter function can be used to restrict the display to selected, saved entries.
- The following filters can be applied:
 - Date / Time
 - Sequential number
 - In the string of existing character chains
 - Character chains in the print string

Data Export

The registered data can be exported – completely or filtered – in various formats

- Excel
- WORD
- PDF

Communication

DISOSAVE X communicates with the weighing electronics either by

- Ethernet (MODBUS-TCP) or
- Serial (MODBUS-RTU)

Technical Data

System requirements PC	
WINDOWS Version	7 or 10
WINDOWS Server	2012 or higher
.NET Framework	4.0 or higher
Software version of the connected device	
DISOBOX Plus	VWW 21000/1-07 or higher
DISOMAT Tersus	VWW 20450/2-12 or higher
DISOMAT Opus	VWW 20700/1-12 or higher
DISOVIEW X	VPC 20011/3-xx
Delivery item	Material number
DISOSAVE X VPC 20016, CD + Serial number	V934087.B01
